## Data Storyteller & Analyst | Fluent in Data. Fluent in Human.

I blend analytical rigor with narrative intuition, turning complex datasets into insights that connect and inform action. With experience spanning global development, hospitality, and analytics, I build work that performs technically and communicates clearly.

## Data Science & Technical Training

**Applied Analytics & Modeling**

- Data Analytics Boot Camp – George Washington University
- Advanced Data Analytics – Google (Coursera)
- Statistical Learning (ISLP – Stanford Curriculum)

**Computer Science Foundations**

- CS50x: Introduction to Computer Science
- Artificial Intelligence (AI) – CS50 / HarvardX
- Python • R • SQL • Cybersecurity • Web Development

## Education

**M.A., International Affairs** – American University, Washington, DC
**M.A., Natural Resources & Sustainable Development** – UN University for Peace, Costa Rica
**B.A., International Development**, – Evergreen State College, WA

- Study Abroad: University of Minnesota, Jaipur, India

## Projects

**Floodlines | Vermont Flood Mitigation Analysis**
informedwanderer.com/workshop/floodlines
*Python • GeoPandas • Leaflet.js • D3.js • OpenFEMA & Census API*
Built a reproducible pipeline integrating FEMA flood risk, Census demographics, and mitigation funding records across Vermont's 250+ municipalities. Developed a need index, tested robustness across multiple model specifications, and deployed findings through an interactive public dashboard and narrative analysis.
*Impact:* Produced a transparent screening framework for identifying communities likely to be underserved by existing mitigation funding.

**Classified: At Risk | Employee Attrition Prediction**
informedwanderer.com/workshop/salifort-employee-churn
*Python • Scikit-learn • XGBoost • SHAP*
Developed a classification model (96.7% accuracy) to predict employee attrition. Selected XGBoost for best recall (0.94) and precision (0.87), minimizing attrition blind spots while reducing false positives. Used SHAP for model explainability and cross-validated with Logistic Regression and Random Forest.
*Impact:* Identified attrition risk by tenure, workload, and satisfaction.

**Capital Crashpad | DC Airbnb Analysis**
informedwanderer.com/workshop/capital-crashpad
*Python • PostgreSQL • Flask • Leaflet.js*
Built an interactive geospatial dashboard analyzing structural breaks in DC's short-term rental market following platform verification enforcement. Combined PostgreSQL and JavaScript visualizations to surface pricing shifts, listing contraction, and minimum-stay shifts.
*Impact:* Revealed that enforcement reshaped both ends of the market, not just low-performing units, reframing the narrative around regulatory market effects.

## Experience

**Supervisor and Lead Bartender** **2012 - Present**
**Tonic Restaurant, LLC** **Washington, DC**

- Boosted sales by 20–30% and cut staffing costs 25% by designing and hosting a popular weekly trivia night that improved customer retention and streamlined scheduling.
- Managed up to 20 staff and reconciled nightly financials up to $25K.
- Trained staff and solved complex problems in a dynamic, multicultural workplace, applying communication and rapid decision-making skills now used in data analysis.

## Technical Skills

**Languages:** Python, R, SQL, JavaScript
**Visualization:** Matplotlib, Seaborn, Plotly, Leaflet, ggplot2, Tableau
**ML & Modeling:** scikit-learn, XGBoost, SHAP, TensorFlow/Keras
**Data Wrangling & EDA:** pandas, NumPy, Tidyverse
**Databases:** PostgreSQL, SQLite, MongoDB
**Web Dev & Scraping:** Flask, Django, REST APIs, Beautiful Soup
**Dev Tools:** Git, Jupyter, RStudio, VS Code

## Publications

PES and REDD+: The Case of Costa Rica (Impact analysis of environmental payments)

## Languages

Spanish (working proficiency), Hindi (elementary proficiency)

*Fluent in Data. Fluent in Human.*
